

## HORIZONTAL MAGNETIC BENCHES SERIES

# **MINIMAG**

Horizontal magnetic benches *MINIMAG* are universal devices that can be connected to mobile or stationary generators *MAGMAN* type.

Suitable generators are from 2000 (A, H or F) type above, optimal is combination *MINIMAG 500* with generator *MAGMAN 4000 H*. This configuration is economical advantage solution with very good ratio price/power at excellent detection ability of magnetizing system.

### **Selected parameters:**

- Clamping length up to 520 mm
- Loading limit on prisms 25 kg, type with supports 50 kg
- Manual shift of carriage to limiting of clamping length, lever brake
- Manual clamping by drift of right clamping head
- Movable coil 3 - 5 turns, diameters 200 (8") or 275 (11")
- Lever switches for coil/current and (depends on type of generator) switching AC/DC
- Maximum of current: AC or DC 3000 A

### **Option:**

- Current generators *MAGMAN H* or *MAGMAN F* type
- Current generators *MAGMAN A* type (recommended from 2000 A type above)
- Stainless tank for 15 l or 40 l of suspension, pump 0,1 kVA, hand hose
- Darkened cabin, axial fan for ventilation, auxiliary lighting
- UV lamp on movable holder
- Gauges, measurement, powders, oils, concentrates of water magnetic ink
